Insurance of Machinery and Electronic Equipment

Insurance of Machinery and Electronic Equipment covers operational damage to the equipment insured. It covers damage resulting from faulty operation, faulty measurement / regulation / safety equipment, design faults or voltage overload. In combination with natural disaster insurance (fire, gusty wind, flood, etc.) and theft insurance, this provides comprehensive cover for machinery and electronic equipment.

Extend your insurance to include business interruption that will cover the losses and fixed costs of the insured party in the event of technical damage to the insured equipment.

COVER IS AVAILABLE FOR:

- ☞ machinery (stationary and mobile);
- ☞ electronic and electrotechnical equipment including portable electronic equipment and electronic equipment built into motor vehicles;
- ☞ equipment accessories (auxiliary equipment, tools and fixed attachments)
- ☞ fixed data storage devices.

WHAT IS INCLUDED IN THE BASIC COVER?

- ☞ damage to or destruction of the insured equipment and damage caused during disassembly and reassembly for cleaning or maintenance or for moving the equipment within the insured location;
- ☞ up to €1,000 of the cost of repairing or reinstalling a damaged or destroyed operating system to the condition it had prior to it being damaged / failure;
- ☞ there is a limit of 10 % of the total insured value for portable electronics and built-in electronic equipment in motor vehicles when insurance is purchased for a set of equipment ;
- ☞ the cost of transporting damaged equipment or parts of equipment to and from the repair shop, duty or other fees as long as these do not exceed the insured value of the equipment, the temporary repair of equipment is also included.
